- Session Q&A:  
Please type questions in the Questions Pane

# Webinar Control Panel

Toggle View Window between Full screen/window mode.

Questions

# Goal of Log Analysis

Find and fix issues in an application before users are affected

Gather other information to provide for healthy application

# Count the Trees

# Sometimes you can't count

# Overview

Log analysis is a way of hiding the forest so you can find the trees.

Part of a larger process

It is not detailed directions on how to analyze log files

Service Manager used as an example

# Overview

Copy log to database

Delete and Filter

Analyze remaining lines

Store other important data for later use

# Demo

# Questions

Please type your questions in the questions pane of your webinar control panel.

# Summary

Standardize process

Analyze

Act

Accumulate data for later analysis

Flexible

# Thank you
